

Field and Lab AC Dielectric Test Sets

15-200 kV

- A premier line of AC Dielectric Test Sets with ratings from 15 to 200 kVAC
- Lightweight and ruggedly constructed for years of field use
- Units feature easy to read digital instrumentation and clean, efficient controls
- Simple set-up and operation
- Low partial discharge output

Model 6CP200/100-10

Model 6CP120/60-7.5

Model 6CP30/15-3

TESTING APPLICATIONS

Suitable for dielectric testing a wide range of electrical apparatus

Specifications are subject to change without notice.

Brochure No. 60700

SAFETY & DESIGN FEATURES

- 2 or 3 piece designs
- Circuit breaker protection
- External interlock provision
- High voltage On/Off pushbuttons with indicator
- Zero Start interlock
- Manual control of output voltage
- Adjustable overload circuit
- Slow and fast-acting transient protection on all meters and relays
- Digital timer with audible alarm
- Digital multi range metering
- Emergency Off pushbutton with key lockout
- Guard mode for accurate current measurements
- Output overload indicator with reset switch
- All interconnect control and power cables are included
- Cable storage provision
- Two copies of operation/ maintenance manual

DESCRIPTION

This portable rugged line of AC high voltage test equipment is ideally suited for use in the field or in the laboratory. The 6CP line offers a complete test system in a mobile package. All units in the 6CP line use a combination control and regulator enclosure and a separate high voltage section. The system is equipped with advanced digital metering, and control and protection devices which are easy to use and provide the operator with all necessary information to safely operate the system. The Metering Guard Mode allows accurate measurements of the high voltage test specimen leakage current by bypassing stray capacitive currents. The high voltage section consists of a specially designed oil insulated high voltage transformer characterized by use of an isolating cylindrical housing mounted on a rugged steel base. The high voltage output is equipped with a corona free aluminum shielding electrode. The high quality design and construction is key to the superior partial discharge performance of the 6CP line. The system arrives ready to use with all power and interconnect cables included; the simple setup allows this 6CP to be ready for testing in minutes. The rugged construction and dependability, backed by long-term warranty makes the 6CP line an ideal choice for your high voltage testing requirements.

	MODEL	6CP30/15-3	6CP50/10-3	6CP100/50-7.5	6CP120/60-7.5	6CP100/50-10	6CP120/60-10	6CP200/100-10

PHENIX Technologies is committed to providing leadership, innovation technology, quality, and service in all areas of our business.

Our 70,000 square-foot headquarters is a modern manufacturing facility. All aspects of electrical, mechanical, and software design and production are performed in this facility and controlled by an ISO9001 certified quality program. Our engineers offer a unique blend of theoretical knowledge and practical experience. Our Service and Calibration Department assists customers during and after installation to insure years of trouble free service.

We carry our commitment into the future as we proudly continue to provide the best in high voltage, high current, high power test systems and components.

High Voltage • High Current • High Power Test Systems and Components
